SUMMARY

I'm a user-focused UI/UX Developer with a keen eye for detail and a passion for crafting intuitive, accessible, and visually engaging digital experiences. I specialize in translating complex requirements into clean, user-friendly interfaces by combining front-end development skills with user-centered design principles. A strong team player, I thrive in collaborative environments where open communication and shared goals drive success. My approach blends creativity with problem-solving, allowing me to contribute to seamless, responsive products that enhance usability and align with business objectives. I stay ahead of design trends and emerging technologies to continuously improve both my work and the user experience.

TECHNICAL SKILLS

C	React	Node.js	Cosmos DB	GitHub
JavaScript(Node.js, React, Vue.js)	Vue.js		MySQL	
	HTML		MS SQL	
	CSS		MongoDB	

PROFESSIONAL EXPERIENCE

Orion Innovation

June 2022 - Present

SmallEntityCosmos Workflow (SEW)

- Small Entity is an audit workflow for all member firms servicing small business, we manage and track audits efficiently across various stages. We are using Cosmos DB as database, particularly taking advantage of its scalability and ability to handle partitioned data efficiently. The system is built with Node.js for backend services and Vue.js for the frontend interface, facilitating smooth user interactions. Additionally, for real-time updates and notifications, we utilize Azure Pub/Sub, which ensures that changes and updates are immediately reflected across the system, enhancing responsiveness.
- Tech Stacks: Vue.js, Node.js, HTML, CSS, JavaScript, COSMOS DB.

KPMG UK Interactive Dashboard Sphinx

- The tool provides an interactive and immersive experience of the balance sheet, income statement, cash flows. The dashboard would allow users to visualize financials in intuitive manner, providing audit insights, trails, evidence and technology/tools being used to well justify the financials. Users will be empowered to explore the audit process, understand the technologies utilized, such and access auditor testimonies through videos and documents.
- Tech Stacks: REACT, Node.js, HTML, CSS, JavaScript.
